

# Mission: Launchpad

## School Readiness Program

- **Is your child starting school next year?**
- **Would you like your child to learn the key skills foundational to success at school?**
- **Do they struggle to follow routines and complete independent work?**
- **Are they often following their own agenda instead of sticking with a group?**

### About the Program

Mission Launchpad is a school readiness program for children who are getting ready for big school! Our skilled and experienced clinicians will individualise goals for your child in areas such as: following school routines, transitioning between activities, participating in group and individual learning, communication, following instructions, and increasing cooperative play skills. All children will be learning in a supportive (minimum 1 staff: 3 children) small group format.
